

Gradients for Pie Charts and Legend

- The pie gradient goes from top left to bottom right (light to dark). The color midpoint is at 20% from top left. This gradient specification applies to all pies.

- The legend gradient goes from top left to bottom right (light to dark). The color midpoint is at 5% from top left.

- The border of the entire pie as well as for the legend icons is 1px and has color value of #272727.

- Color order is as shown on the right. For pies, the colors go in the clockwise direction (highest market value is index 1 and so on). For legends, the colors go from left to right and then to the next row down.

- 1) **Yellow**
